# The International Association of Financial Engineers

## What is the IAFE ?

The International Association of Financial Engineers (IAFE) is the not-for-profit, professional society dedicated to fostering the profession of quantitative finance by providing platforms to discuss cutting-edge and pivotal issues in the field. Founded in 1992, the IAFE is composed of individual academics and practitioners from banks, broker dealers, hedge funds, pension funds, asset managers, technology firms, regulators, accounting, consulting and law firms, and universities across the globe.

Through frank discussions of current policy issues, sponsoring programs to educate the financial community and recognizing the outstanding achievements in the field, the IAFE acts as a beacon for the development of quantitative finance. Throughout its history, the IAFE's pre-eminent leadership has positioned us to respond with savvy to the evolving needs of the financial engineering community. The IAFE's programs - from our area-specific committees to our monthly panel discussions to the Financial Engineer of the Year Award - are designed to provide our membership with uniquely valuable activities to enhance their work in the field and opportunities to network and socialize with their colleagues.

## How do I join?

Joining is simple! The only requirement is the annual payment of IAFE Membership dues. Just fill out our membership form — online at [www.iafe.org](http://www.iafe.org) or in paper. You will be sent a confirmation of your membership via email and a receipt will be mailed to you.

## ALL IAFE MEMBERS ENJOY THE FOLLOWING BENEFITS:

**Exclusive web content.** Members have access to exclusive content on our website including videos of some of our most popular events as well as access to the entire archive of the IAFE's former publication, the Journal of Financial Engineering.

**Free committee membership.** One of the most exciting aspects of our organization, our committees are area-specific initiatives to discuss policy issues in depth. Our committees focus on: Investor Risk, Operational Risk, Credit Risk, Technology and Education. Committee membership is a fantastic way to get ahead of the curve in the field and take part in best practice discussions.

**Free attendance to IAFE Evening Forums.** The IAFE holds monthly talks and panel discussions on pressing topics in the field of quantitative finance and the policy issues that are just around the corner. Our meetings are designed to provide a high-level of frank discussion and an opportunity to network with other individuals involved in the field.

**Special rates for over nine Institutional Investor Journals.** This includes a 50% savings on the IAFE's official publication: The Journal of Derivatives.

**Discounts to IAFE Endorsed Conferences.** As part of our educational mission, we endorse conferences that we believe our membership would value. Conference fees can be exorbitant and the 20% discount that our members usually receive often saves them a dollar amount exceeding the price of their IAFE membership.

**Free Quarterly Newsletter.** The IAFE newsletter keeps our membership, and the quantitative finance community, informed of news in the field, while reviewing the IAFE's activities and highlighting current issues and events. The newsletter is sent out in November, February, May and August/September via email.

**Invitations to our Annual Membership Conference and the Financial Engineer of the Year Award Dinner.** As our highest profile events, tickets are required. Each offers a unique opportunity to socialize with the individuals making significant contributions to the field.

**Discount for the Alternative Market Briefing from Opalesque, LTD.** Every day 40,000 hedge fund and investment professionals get their Alternative Market Briefing from Opalesque, which delivers the most important daily news for professionals dealing with hedge fund. IAFE members save 15% (pay only \$159.29) for a full one-year subscription.
